I'm a Mechanical Engineering graduate but I discovered Web Development during the pandemic. I am passionate about technology in the digital space. Working with you will be a coming together of competence and opportunity which I actively seek.

PROJECTS

[Hostelpaddy.com](#) - **Hostel management system for Nigerian students** - Frontend Developer

April 2021 - Present

- Build web pages working closely with the UI/UX design team and back-end developers.
- Create and test the user interface and interactive aspects of the website.
- Ensure web pages are responsive and work effectively on smaller screens.
- Used: HTML, CSS, JavaScript and Bootstrap.

[Manag3x.com](#) - **Business management software to help micro, small and medium scale**

enterprises effectively manage their daily business activities - Frontend Developer

March 2021 - Present

- Build responsive web pages based on designs provided by the design team.
- Used: HTML/CSS and JavaScript.
